PROFILE SUMMARY

SDET with **3+ years of experience** specialising in building **scalable, maintainable automation frameworks** from Scratch. Experienced across UI automation, API testing, and CI/CD integration - using **Selenium, RestAssured, Jenkins, and Playwright**. Leveraged **AI** to elevate automation standards and accelerate test creation, **cutting authoring time by 75%**. Focused on delivering automation that improves **product quality**, not just coverage numbers.

SKILLS

Automation & Frameworks: Selenium WebDriver, Rest Assured, Playwright

Programming Languages: Java, Python, TypeScript

AI & Developer Tools: Cursor, Playwright MCP, Amazon Q Developer

Tools & Platforms: Git, Jenkins, Postman, Jira, VS Code, AWS

WORK EXPERIENCE

Senior SDET

Tech Mahindra — Bangalore, India

March 2024 – Present

- Architected **Selenium + Java automation framework** from scratch for Digital Investigation Platform, enforcing a **structured POM architecture** that made tests easy to scale, maintain, and reuse across the team. across two core enterprise platforms.
- Drove **35% automation coverage** of critical workflows within **3 months**, reducing regression cycles from **3 weeks to 2 weeks** and accelerating release confidence.
- Conducted **code reviews** for automation scripts, ensuring adherence to coding standards and long-term maintainability across the codebase.
- Built reusable utility libraries and configured **parallel execution with Allure reporting**, eliminating test duplication, enabling cross-browser coverage, and **cutting suite runtime** significantly across every CI build.

Test Automation Engineer

Nagarro Pvt. Ltd. — Gurgaon, India

Sept 2022 – Nov 2023

- Built a **Selenium Java automation framework** for a **Learning Management System**, utilising **TestNG, Maven, and Zephyr** for end-to-end test lifecycle management.
- Developed and maintained **400+ automated test cases** covering critical **sanity and regression** workflows, **reducing cycle time by up to 40%**.
- Built reusable components and custom utilities underpinning **cross-browser** compatibility testing on dynamic content via Selenium WebDriver, ensuring a maintainable, consistent suite across all environments.
- Integrated **Log4j** logging and **Allure** reporting while tracking defects in **Jira** and **Zephyr**, enabling seamless debugging, clear visibility into failure trends, and timely resolution in collaboration with developers and product owners.

EDUCATION

Dr. B.C. Roy Engineering College

Bachelor of Technology in Electronics and Communication - 8.4 CGPA

Durgapur, India

Aug 2018 – June 2022

ACHIEVEMENTS

- Received two times **Performer of the month**.
- Completed a **6-month internship at Wipro** as an **Automation Tester Intern**.
